

# Chrome OS

Chromebooks run on Chrome OS - an all-new operating system designed by Google for a new generation of computers. It's browser-based, cloud-powered, and boots up in seconds, which allows you to connect to the internet almost instantly. And, thanks to Chrome OS, updates are managed automatically so Chromebooks become faster and more secure over time.

## Chrome Books

A Chromebook is a laptop or tablet running the Linux-based Chrome OS as its operating system. Most computer manufacturers produce a chromebook.

Chrome OS is the speedy, simple and secure operating system that powers every Chromebook.

Chromebooks have the Everything Button. It's one button that helps you find what you need fast. Like files. And apps. And answers online. Press it and get what you need, all from one place

Work and play with up to 12 hours on a single charge. With Chromebook, you don't even need to remember your charger.

No Wi-Fi, no problem. Recent documents, spreadsheets, presentations and emails are all available with offline access.

Swipe, tap and scroll the way you want. There are many touchscreen enabled Chromebooks. With features like built-in virus protection and secure support for multiple users, Chromebook keeps you and your data protected.

Chrome OS keeps different software on your Chromebook separate with Sandboxing. So even if one part gets infected, the rest is designed to stay safe.

Every time your Chromebook starts up, it goes through Verified Boot, a rigorous and seamless security check-up in the background that prevents malware.

Protect your data. Every Chromebook includes a built-in security chip to encrypt your most sensitive data and keep it away from prying eyes.

Know your Chromebook will stay safe.

Built-in virus protection defends your Chromebook from malware automatically. You can focus on what you need to do, instead of installing third-party security software. Chromebooks boot up in seconds, and with automatic updates you get the latest software without being interrupted.

## Google PixelBook

Pixelbook has a 4-in-1 design to seamlessly adjust to whatever you want to do with laptop, tablet, tent and entertainment modes.

Google Pixelbook comes with a 7th Gen Intel Core processor for faster browsing, multi-tasking, entertainment and more. It has up to 16GB of RAM and 512GB of internal storage.

Quickly get answers, get things done, manage your day and more. The Google Assistant is always there to help. And there are 3 ways to access the Assistant, just talk, type or circle with your Pixelbook Pen.

Meet the smart, responsive pen for your Google Pixelbook. With virtually no lag, tilt-support and pressure sensitivity it feels natural, like a pen on paper<sup>4</sup>. Use your Pixelbook Pen to get help from the Google Assistant and more.

Google Drive automatically backs up your most recent Google Docs, Sheets and Slides to use offline. With up to 512GB of hard drive storage, you can store your favourite movies, shows, music and more.
